

**The Plan
To
Secure Our Elections
DONOR BRIEF**

2024 ELECTION

"THANK YOU TO MIKE LINDELL AND HIS ENTIRE TEAM AT CAUSE OF AMERICA AND THE NEW ELECTION CRIME BUREAU FOR BRINGING TOGETHER ELECTION INTEGRITY EXPERTS AND ORGANIZATIONS TO HOLD THE GOP ACCOUNTABLE. WE AT TURNING POINT ACTION ARE IN SOLIDARITY WITH THE COMMUNITY THAT IS KEEPING EYES ON THE LEFT AND IT'S THE MOST CRITICAL THING WE MUST DO TO KEEP ELECTIONS FAIR FOR EVERYONE. WE MUST HAVE COUNTY ELECTIONS OFFICIAL EVERYWHERE READ THIS RESOLUTION."

-CHARLIE KIRK

General Mike Flynn

“In order for our nation, the United States of America, to remain a free nation, America requires a fair election system. Mike Lindell, through his courageous efforts using the Election Crime Bureau and bringing together millions of patriots to stand for free and fair elections, has accomplished that and more.

Mike understands as all Americans do, the sacrosanct privilege we have of voting. This is what makes us all equal in the eyes of each other and under God. I fully support these and other efforts that Mike is pursuing to save our election in order to save our country.”

How We Got Here

After the 2020 election was stolen, Mike Lindell became the face of securing election platforms in America.

WE'VE SPENT THE LAST THREE YEARS BUILDING AN ELECTION CRIME PREVENTION NETWORK

Plus \$12M investment in computers and other equipment

IN JUST 3 YEARS Mike has AMPLIFIED the previously unspoken controversial topic to being mainstream conversation.

For the first time ever, a real national network has been created to save our country.

The Plan Overview

At the 2023 Election Summit, Mike Lindell revealed the following components of his Plan to Secure Our Elections

  	<h3>Real-time Election Monitoring</h3>	<p>The Wireless Monitoring Device to provide REAL time election oversight. We will prove in real time whether voting machines ARE connected to the internet.</p> <p>FrankSocial, an online app that connects average Americans to one another as a tool to report election malfeasance while watching real time accounts of election interference in their own backyard. EVERYONE can participate with a free account.</p> <p>Courage App enables effective canvassing of voter rolls before elections and voter histories after elections</p>
	<h3>Cause of America</h3>	<p>CAUSE OF AMERICA (COA); real time election monitoring with the largest grassroots effort in the country. Over 300,000 volunteers on the ground going county by county to change laws, remove machines, teach hand count voting and more.</p>
	<h3>Media Platform</h3>	<p>FrankSpeech, the fastest growing media hub is sharing REAL news in REAL time. A user friendly site, FRANKSPEECH is now better than ever for the masses.</p>
	<h3>Election Crime Bureau</h3>	<p>The Election Crime Bureau is the central hub that brings information coming from COA and FrankSocial to one place. The information is parceled out to our experts for cyber crime investigation, or lawfare determination, or to be shared on media</p>

Real-Time Monitoring System

The detection and reporting of election fraud indicators has taken far too long in the past. In order to ensure that the election results indicate the true winner of any contest, this information needs to be available much sooner. That is why the Plan features several resources that will empower citizens with the ability to monitor elections and report on election incidents in real time..

Wireless Monitoring Device (WMD)

FrankSocial

Real-Time Monitoring System

Wireless Monitoring Device (WMD)

The WMD is a self-contained device capable of detecting and identifying on-line devices of all kinds. It is a *passive* collection device, using proprietary hardware and software to perform the detection and report online systems in real time to a central data repository and web-based activity viewer.

What it Does:

- Detects all online systems up to 200 feet of the device location.
- Records IP addresses, device identification, and signal strength for all detected online systems.
- Records the public access name (SSID) of all wireless access points.
- Records the number of devices connected to each access point and the change over time.
- Records time and date of when devices go online and offline.
- Saves all connection data to a secure server for later analysis.

What it Doesn't Do:

- Does not have the capability to interfere with any network functionality.
- Does not have the capability to view or record, inspect, alter, or destroy any actual data being transmitted or received.
- Does not have the capability to view or record, save, or publish any login credentials or security information.

NOTE: *The usage of this device will be fully compliant with [Title 18 USC Section 2511](#) pertaining to the interception and disclosure of wire, oral, or electronic communications.*

The information transmitted by the WMD is analyzed by the Election Crime Bureau Cyber Unit. The Cyber Unit will be able to filter the incoming data to isolate election equipment that is connected to the internet. This information will be displayed on the WMD Master Control Display which can be mirrored on ElectionCrimeBureau.com during elections.

Real-Time Monitoring System

FrankSocial

Citizens monitoring election operations will be able to report election incidents real-time via an updated version of the FrankSocial application. Using FrankSocial, citizens will be able to take photos or video of incidents and post their observations in dedicated post streams organized by hashtags.

SUPPORTING THE GRASSROOTS

The more Mike Lindell spoke out about 2020, he realized that there had to be a place that citizens could go to get information, help, and a way to get involved in their own cities and counties.

Proof of Concept: In late 2021 Mike Lindell met with a group out of Colorado that had developed almost the same model with an established infrastructure for their statewide grassroots election integrity group that Mike had envisioned. The group, The U.S. Election Integrity Plan, was 100% volunteer, non-partisan, independent, and had raised no funding. Within a year the group had accomplished:

- Established an efficient operational infrastructure www.useip.org
- In December of 2020, organized the first hearing in the U.S. calling for the Colorado House Audit Committee to audit the 2020 election.
- Established a network of new and existing groups in nearly every Colorado county to work on election issues on the local level.
- Expanded past Colorado with representation in 33 states.
- Conducted a sophisticated canvassing project that gathered hundreds of voter affidavits. The results of the canvassing generated a report and a video that exposed

1 out of every ten Colorado voters were affected by election irregularities in the 2020 election. This canvassing report is now being used as evidence in at least one court case. It's anticipated more are on the horizon.

- Gained national attention in the press for their work and achievements in Colorado and other states.

Within a month of the first meeting, the Cause of America was established. Its mission was to scale what USEIP had done in Colorado to every state in the U.S.

Now, Cause of America is a one-stop-shop for any individual or group that wants to connect with the network to get involved in local election integrity work. The non-profit is led by a team of 5 and runs on a total staff of 9 people who work virtually. Cause of America is not building an empire, it's the opposite. Its job is to support, advise, share knowledge, resources, training, and connections for self-directed grassroots volunteer groups. www.causeofamerica.org

The Cause of America organization contributes to many of the LLOF legal cases with plaintiffs, intelligence, whistleblowers, press, events, and crowdsourced activities. It creates an evergreen, two-way, win-win, ecosystem between the overall LLOF efforts and the Cause of America grassroots network coalition.

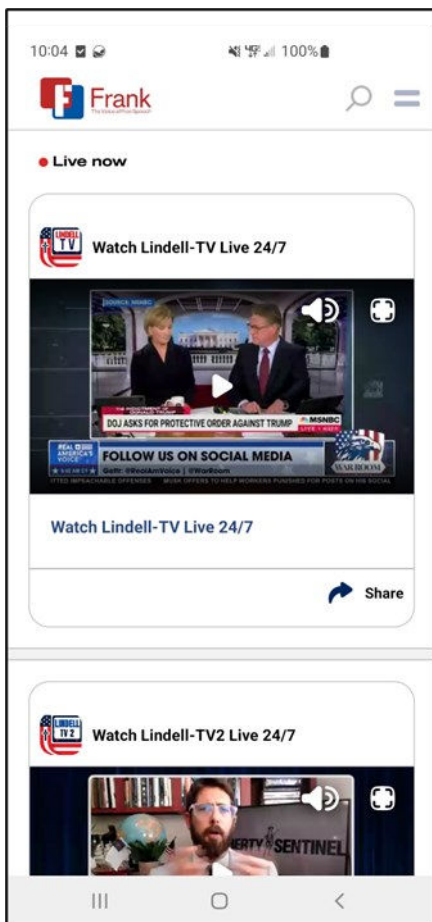

Cause of America App
 Provides grassroots canvassers with powerful access to latest voter status information enabling citizens to identify and resolve voter fraud issues faster than ever.

FrankSpeech

The observations of individual citizens become amplified via the FrankSpeech platform. FrankSpeech provides a powerful means to amplify the reports and messages posted on FrankSocial. The various broadcast channels and podcast channels provide mechanisms to go around mainstream media censorship of important information.

Frankspeech features three livestream broadcast platforms that enable anyone with an internet connection to receive instant notification of news that matters.

Frankspeech features over 120 unique podcast channels that enable targeted messaging to millions of subscribers. The number of podcasts supported on the Frankspeech continues to grow.

Weeknights at 7pm ET, the iconic and award-winning Lou Dobbs is in full force and bringing back the truth each night. His return is so important to our country and freedom.

FrankSpeech.com

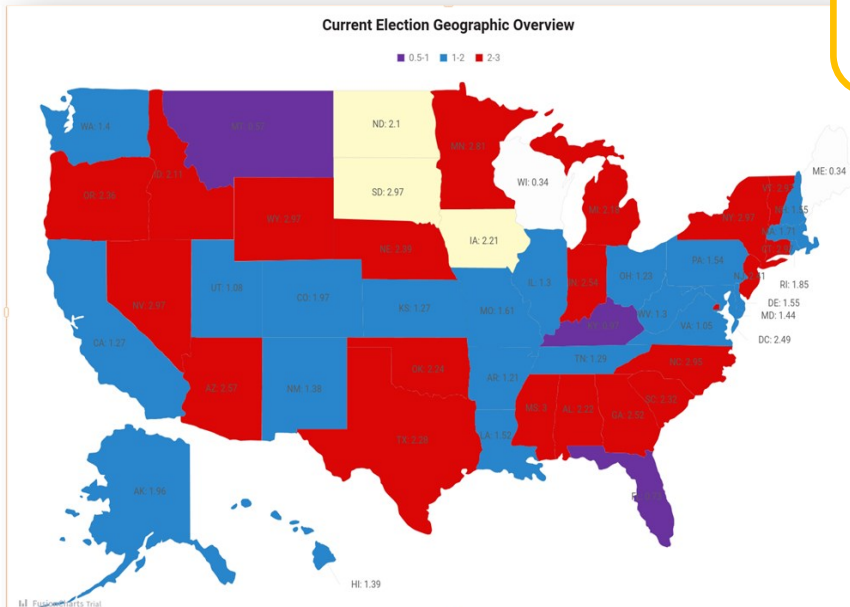

electionoverwatch.tv

ELECTION OVERWATCH

The newest addition to the FrankSpeech programming lineup will be Election Overwatch. Election Overwatch will be a 24/7 livestream channel featuring structured program schedule dedicated to specific election integrity topics. Experts will share information on national topics as well as state-specific topics. Channel will also serve as a content factory for popular Lindell TV shows such as the Lindell Report and robust podcast lineup.

Channel will be THE destination for all viewers interested in the #1 issue on voters minds.

Interactive Election Overwatch Dashboard is centerpiece of website and each show. Hosts and website visitors can drill down from nation to state to county to see election-related data specific to that region. Data will range from election results to lawsuits, legislation, and specific election integrity measures such as voter roll integrity by state.

Eight hours of live programming per weekday. Sixteen hours of targeted, organized archived programs available to viewers via digital programming guide.

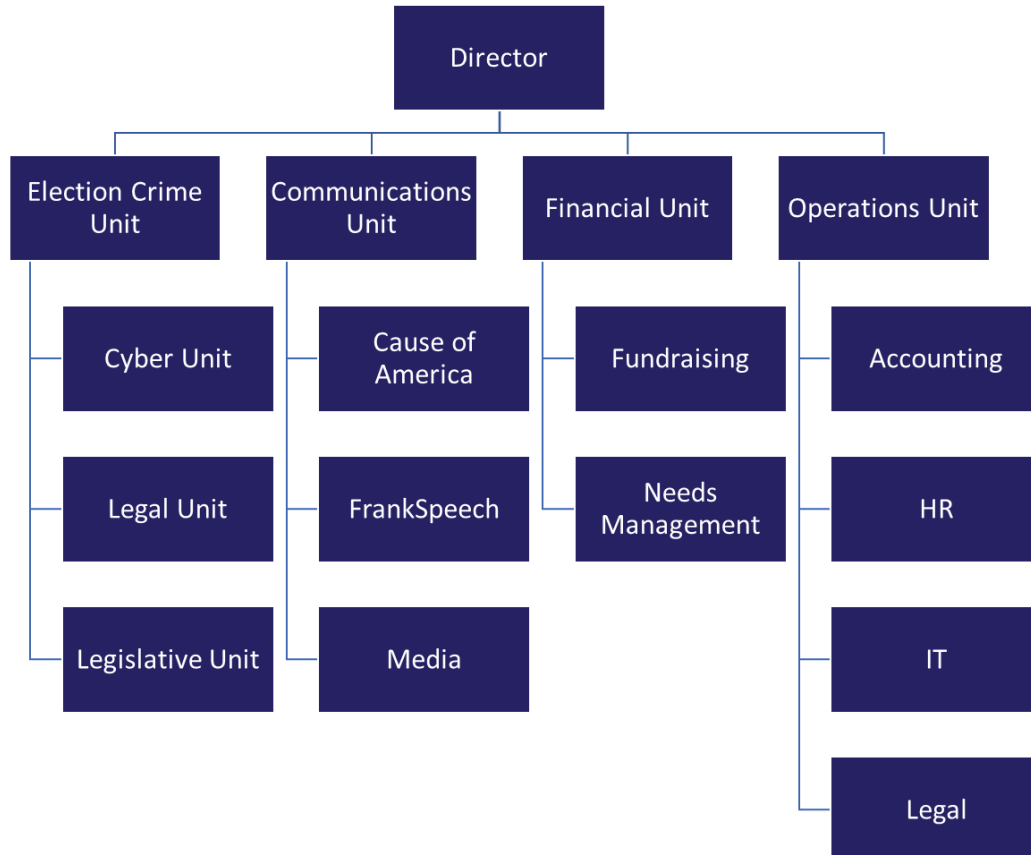

Election Crime Bureau

Those individuals and organizations who are engaged in subverting the integrity of our elections on a national scale are working 24/7/365 towards those aims. They are numerous. Their organizations are well-networked. They are well-funded.

In contrast, those individuals and organizations who are engaged in the battle to preserve election integrity on a national scale are outnumbered, not as well-networked, and underfunded. That needs to change.

That's where the Election Crime Bureau fits in.

In much the same way that Elliot Ness assembled a specialized group of patriots immortalized as “the untouchables” to secure our rights, the Election Crime Bureau is assembling specialists to secure our elections. This bureau provides 24/7/365 focus on this mission.

How We Beat Them

The Plan does not rely upon elected officials securing the rights of the governed.

The Plan does not rely upon judges who issue opinions without political bias.

The Plan does not rely upon law enforcement holding those responsible for election crimes accountable.

The Plan relies upon We the People.

The Plan relies upon We the People being informed.

The Plan relies upon We the People taking action.

The Plan relies upon We the People holding elected officials, judges, and law enforcement accountable for their actions or inaction.

All it takes is for Americans who love their country to honor the commitment of our Founders by dedicating themselves to a renewed commitment to freedom.

The Plan is Working!

FrankSocial provided means of tracking and organizing nationwide election incidents during 2023 general election in real-time!

The Plan is Working!

Wireless Monitoring Devices (WMD's) detected and classified devices connected to internet near polling locations in real-time!

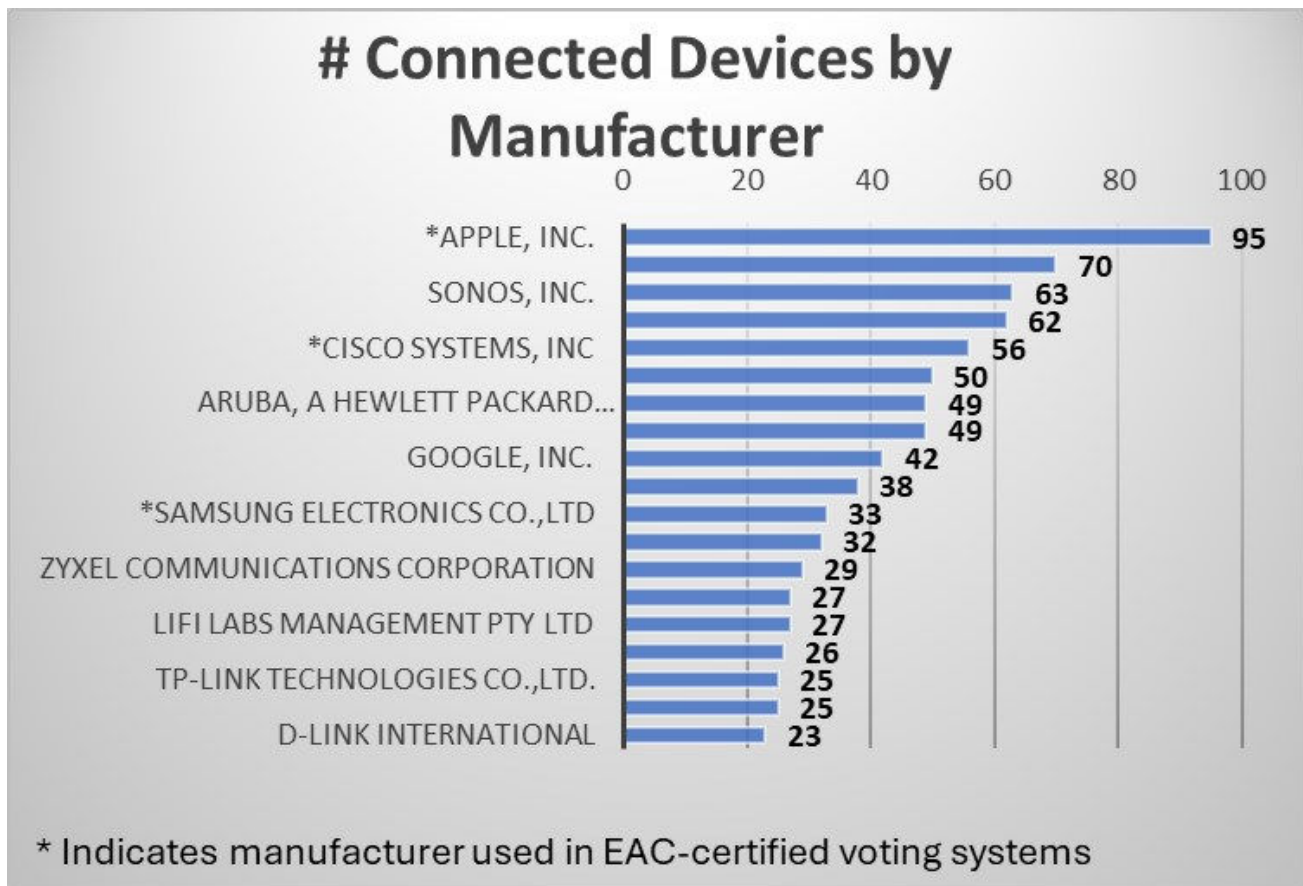

2023 Election deployment covered 11 counties in 3 states.

The Plan is Working!

Many of the devices connected to the internet near polling locations correspond to manufacturers featured in EAC-certified configurations of electronic voting systems.

NOTE: Electronic Voting System manufacturers typically do not manufacture their own hardware components. They often use commercially available equipment.

Our Challenge

Our federal government has been weaponized to censor Americans who share the truth about what is happening in our elections. The Election Integrity Partnership was launched as their primary censorship mechanism.

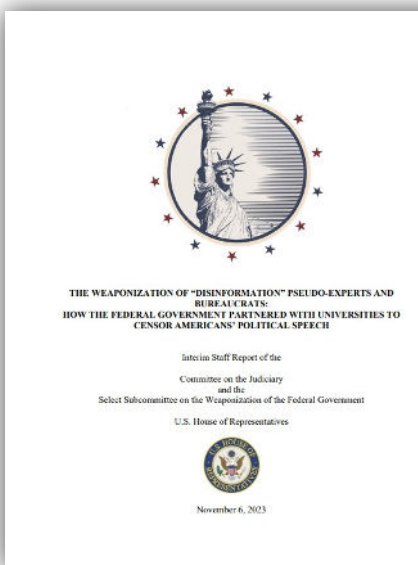

Four Major Stakeholder Groups

Government	
Civil Society	
Platforms	
Media	<p><i>We did not formalize partnerships with media, but we engaged with interested journalists from local and national media organizations.</i></p>

Figure 1.3: Major stakeholder groups that collaborated with the EIP.

The U.S. House recently released a report that provided clear evidence that federal agencies were actively censoring Americans who shared evidence of election fraud. This is a blatant violation of the First Amendment of the U.S. Constitution.

 Subject: CIS & NASS/NASED & DHS Call

Team,

Wanted to share a read-out from our call late Friday with DHS, NASS & NASED. Great job by [redacted] & [redacted]

No action for us now, however, we will reconvene after a Beta test of their proposed reporting portal in the next few weeks.

Best,
 [redacted]

TL;DR: On May 29, U.S. Public Policy ([redacted]), P&G Outreach ([redacted]), and Security Policy ([redacted]) met with DHS, the Center for Internet Security, and NASS/NASED about a "Misinformation Reporting Portal" that CIS is developing for state and local-level elections officials to report mis/disinformation and IO-type activity concerning election interference to the platforms, with a focus on Facebook, Twitter, and Google. Following a beta test CIS will do in Florida, Colorado, North Carolina, and Rhode Island in early June, they would like to do a demo for Facebook. Internally, Facebook would prefer our independent reporting channel which makes us an industry leader, and was reported as successful by all parties on this call and is monitored 24/7, but we are aware that if the majority group moves towards a centralized channel, there are PR challenges for not participating.

o **Highlights:**

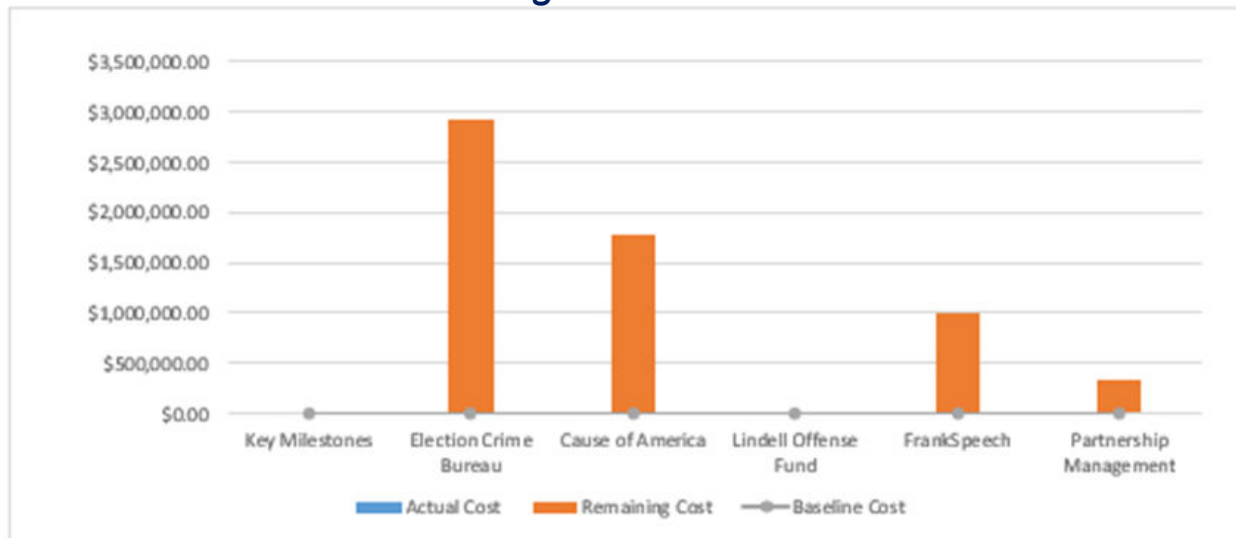

- DHS cannot openly endorse the portal but has behind-the-scenes signaled that NASS/NASED has told them it would be easier for many states to have "one reporting channel" and CISA and its ISAC would like to have incoming the same time that the platforms do.
- CIS is in discussions with Twitter to gauge their interest, and it was unclear what engagement has been with Google.
- CIS is talking with Graphika, which has said it is interested in nationwide trends that the reporting portal may reveal.
- CIS is talking with the Belfer Center, which is developing an "IO Playbook & Training" that may be released in the coming months before November 2020.
- NASS/NASED is supportive, but not all the states are onboard – CIS said they would like to launch with platforms supportive and engaged and bring states incrementally along.
- CIS would like some sort of API with Facebook – such a set up may be impossible, and CrowdTangle, if this progresses, may be the way to go.

Investment and Impact

We need to reach 150 Million voters with the truth about what is happening in our elections.

Your financial support will be used to provide the resources needed to investigate the truth and then make sure that we give every voter the opportunity to hear the truth.

We need to have the ability to overcome the unconstitutional censorship by Big Tech and Big Media under the direction of the federal government.

We have developed a 13,320 task project plan delineating tasks, timing and resources necessary to secure the 2024 election. In order to execute this plan, we need to raise a minimum of \$6M.

Total 2024 Budget: \$6,050,000

We know that we will be opposed in this endeavor by those invested in subverting the integrity of our elections. In this light, we need to have additional funds to support current and future legal actions.

Fundraising Goal: \$20,000,000
