# The Plan Overview

At the 2023 Election Summit, Mike Lindell revealed the following components of the Plan to Secure Our Elections:

Realtime Election Monitoring

✳ The Wireless Monitoring Device will provide realtime election oversight to prove whether voting machines are connected to the Internet.

✳ FrankSocial is an app that connects average Americans to one another as a tool to report election malfeasance while watching realtime reports of election interference in their communities. Accounts are free and <u>everyone</u> can participate.

✳ Courage App enables effective canvassing of voter rolls before elections and voter histories after elections.

Cause of America (COA)

✳ Realtime grassroots election monitoring with the largest effort in the nation: Over 300,000 volunteers on the ground will go county-to-county to change laws, remove machines, teach hand-counting, and more. <u>www.CauseOfAmerica.org</u>

Media Platform

✳ FrankSpeech—the fastest-growing user-friendy media hub—is sharing real news in real time.

Election Crime Bureau

✳ The Election Crime Bureau is the central hub to bring information issued from Cause of America and FrankSocial into one place. This information is then parceled out to our experts for cyber crime investigation, lawfare determination, or shared on media.
