

*The Plan
to
Secure Our
Elections*

—2024—

Charlie Kirk

“Thank you to Mike Lindell and his entire team at Cause of America and the new Election Crime Bureau for bringing together organizations to hold the GOP accountable. We at Turning Point Action are in solidarity with the community that is keeping eyes on the Left, and it’s the most critical thing we must do to keep elections fair for everyone. We must have county elections officials everywhere read this Resolution.”

“In order for our nation, the United States of America, to remain a free nation, America requires a fair election system. Mike Lindell, through his courageous efforts using the Election Crime Bureau and bringing together millions of patriots to stand for free and fair elections, has accomplished that and more.

Mike understands as all Americans do, the sacrosanct privilege we have of voting. This is what makes us all equal in the eyes of each other and under God I fully support these and other efforts that Mike is pursuing to save our election in order to save our country.”

How We Got Here

After the 2020 election was stolen, Mike Lindell became the face of securing election platforms in America.

WE'VE SPENT THE LAST THREE YEARS BUILDING AN ELECTION CRIME PREVENTION NETWORK

Plus \$12M investment into computers and other equipment.

Mike has amplified the previously unspoken controversial topic into a mainstream conversation and created the nation's first network to save our country.

The Plan Overview

The Plan to Secure Our Elections is in play.

Realtime Election Monitoring

* VOCL (Formerly FrankSocial) is an app that connects average Americans to one another as a tool to **report election malfeasance** while watching realtime reports of election interference in their communities. Accounts are free and everyone can participate. Join the community today at VOCL.com!

Cause of America (COA)

* Realtime **grassroots election monitoring** with the largest effort in the nation: Over 300,000 volunteers on the ground are going county-to-county to change laws, remove machines, teach hand-counting, and more. www.CauseOfAmerica.org

Media Platform

* FrankSpeech—the fastest-growing user-friendly media hub—is **sharing news** in real time without censorship. FrankSpeech is now publicly traded.

Election Crime Bureau

* The Election Crime Bureau is the **central hub to bring information** issued from Cause of America and VOCL into one place. This information is then parceled out to our experts for cyber crime investigation, lawfare determination, and shared on FrankSpeech.

Real-Time Monitoring System

The detection and reporting of election fraud indicators has taken far too long in the past. In order to ensure that the election results indicate the true winner of any contest, this information needs to be available much sooner. That is why the Plan features several resources that will empower citizens with the ability to monitor elections and report on election incidents in real time.

Wireless Monitoring Device

Real-Time Monitoring System

Wireless Monitoring Device

This self-contained device can detect and identify online devices. It is a passive collection device, using proprietary hardware and software to perform the detection and report online systems to a central data repository and web-based activity viewer.

What it Does:

- Detects all online systems up to 200 feet of device location.
- Records IP addresses, device ID, and signal strength for all detected online systems.
- Records the public access name (SSID) of all wireless access points.
- Records the number of devices connected to each access point and the change over time.
- Records time and date of when devices go online and offline.
- Saves all connection data to a secure server for later analysis.

What it Doesn't Do:

- Does not have the capability to interfere with any network functionality.
- Does not have the capability to view, record, inspect, alter, or destroy any actual data being transmitted or received.
- Does not have the capability to view or record, save, or publish any login credentials or security information.

NOTE: Usage of this device will be fully compliant with Title 18 USC Section 25u pertaining to the interception and disclosure of wire, oral, or electronic communications. The information transmitted by the WMD is analyzed by the Election Crime Bureau Cyber Unit. The Cyber Unit will be able to filter the incoming data to isolate election equipment that is connected to the Internet. This information will be displayed on the WMD Master Control Display which can be mirrored on ElectionCrimeBureau.com during elections.

Real-Time Monitoring System

Citizens monitoring election operations will be able to report election incidents real-time via an updated version of the VOCL application. Using VOCL, citizens will be able to take photos or video of incidents and post their observations in dedicated post streams organized by hashtags.

VOCL

"They cannot tell a lie."

Cause of America

Supporting the Grassroots

As Mike Lindell spoke out about 2020, he realized there had to be a place citizens could go to for information, help, and a way to get involved in their counties and cities.

Proof of Concept: Late in 2021, Mike met with a group out of Colorado that had developed a model with an established infrastructure for their statewide grassroots election integrity. The U.S. Election Integrity Plan was 100% volunteer, non-partisan, independent, and non-funded. Within a year, the group had:

- Established an efficient operational structure: www.useip.org
- Organized in December of 2020 the first hearing in the U.S. calling for the CO House Audit Committee to audit the 2020 election.
- Established a network of new and existing groups in nearly every CO county to work on election issues at the local level.
- Expanded past CO with representation in 33 states.
- Conducted a sophisticated canvassing project that gathered hundreds of voter affidavits. The results of the canvassing generated a report and video exposing that one out of every ten CO voters had been affected by election irregularities in the 2020 election. This canvassing report is now being used as evidence in at least one court case, with more anticipated.
- Gained national attention for their work and achievements in CO and other states.

Within a month of the first meeting, the Cause of America (COA) was established with the mission to scale what USEIP had done in CO to every state in the U.S.

COA is now a one-stop-shop for any individual or group wanting to connect with the Network and get involved in local election integrity work. The non-profit is led by a team of 5 and runs on a total staff of 9 who work virtually. COA is not building an empire. Its purpose is to support and advise, as well as share knowledge, resources, training and connections for self-directed grassroots volunteer groups.

The organization contributes to many of the the LLOF legal cases with plaintiffs, intelligence, whistleblowers, press, events, and crowdsourced activities. It creates an evergreen two-way, win-win ecosystem between overall LLOF efforts and the COA grassroots network coalition.

FrankSpeech

FrankSpeech amplifies the observations and reports of individual citizens posting on the platform. The myriad broadcast channels and podcast shows provide a means to go around Legacy Media censorship.

FrankSpeech features three livestream broadcast platforms that enable anyone with an internet connection to receive instant notification of news that matters.

 **FRANKSPEECH**

FrankSpeech features over 120 unique podcast channels that enable targeted messaging to millions of subscribers. The number of podcasts supported by FrankSpeech continues to grow.

FRANKSPEECH

COMMON SENSE.

Lou Dobbs 1925-2024

Beloved, award-winning journalistic icon Lou Dobbs returned to the air to serve our country and our freedom before passing 07/18/24.

Emerald Robinson

Intrepid journalist and former White-House correspondent, Emerald Robinson, joined FrankSpeech in 2022.

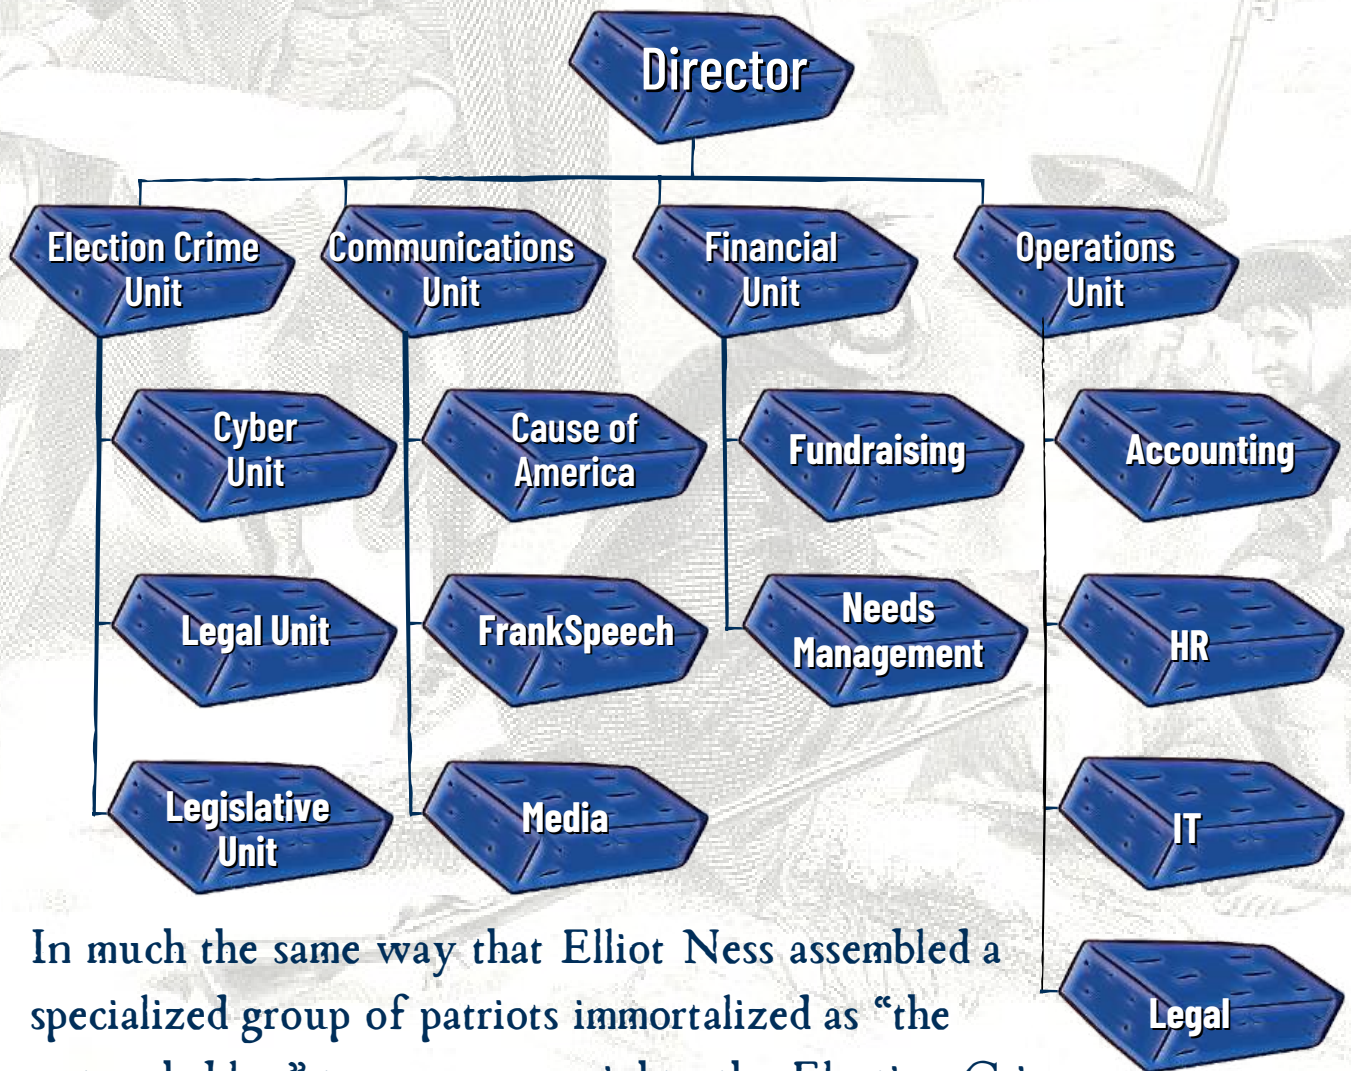

Election Crime Bureau

Those individuals and organizations engaged in subverting the integrity of our elections on a national scale are working 24/7/365. They are numerous, well-networked, and well-funded.

In contrast, those engaged in the battle to preserve election integrity on a national scale are outnumbered, not as well-networked, and underfunded.

That needs to change. That's where Election Crime Bureau fits in.

In much the same way that Elliot Ness assembled a specialized group of patriots immortalized as “the untouchables,” to secure our rights, the Election Crime Bureau has assembled specialists to secure our elections.

How We Beat Them

The Plan does not rely on elected officials securing the rights of the governed.

The Plan does not rely on judges who issue opinions without political bias.

The Plan does not rely upon law enforcement holding accountable those responsible for election crimes.

The Plan relies upon We the People.

We the People being informed...

We the People taking action...

We the People holding elected officials, judges, and law enforcement accountable for their action or inaction.

All it takes is for Americans who love their country to honor the commitment of our Founders by dedicating themselves to a renewed commitment to Freedom.

The Plan is Working!

VOCL (FrankSocial) provided the means of tracking and organizing nationwide election incidents during the 2023 general election!

The Plan is Working!

Many of the devices connected to the Internet near polling locations correspond to manufacturers featured in Election Assistance Commission (EAC)-certified configurations of electronic voting systems.

Note: Electronic Voting System manufacturers typically do not manufacture their own hardware components. They often use commercially available equipment.

Connected Devices by Manufacturer

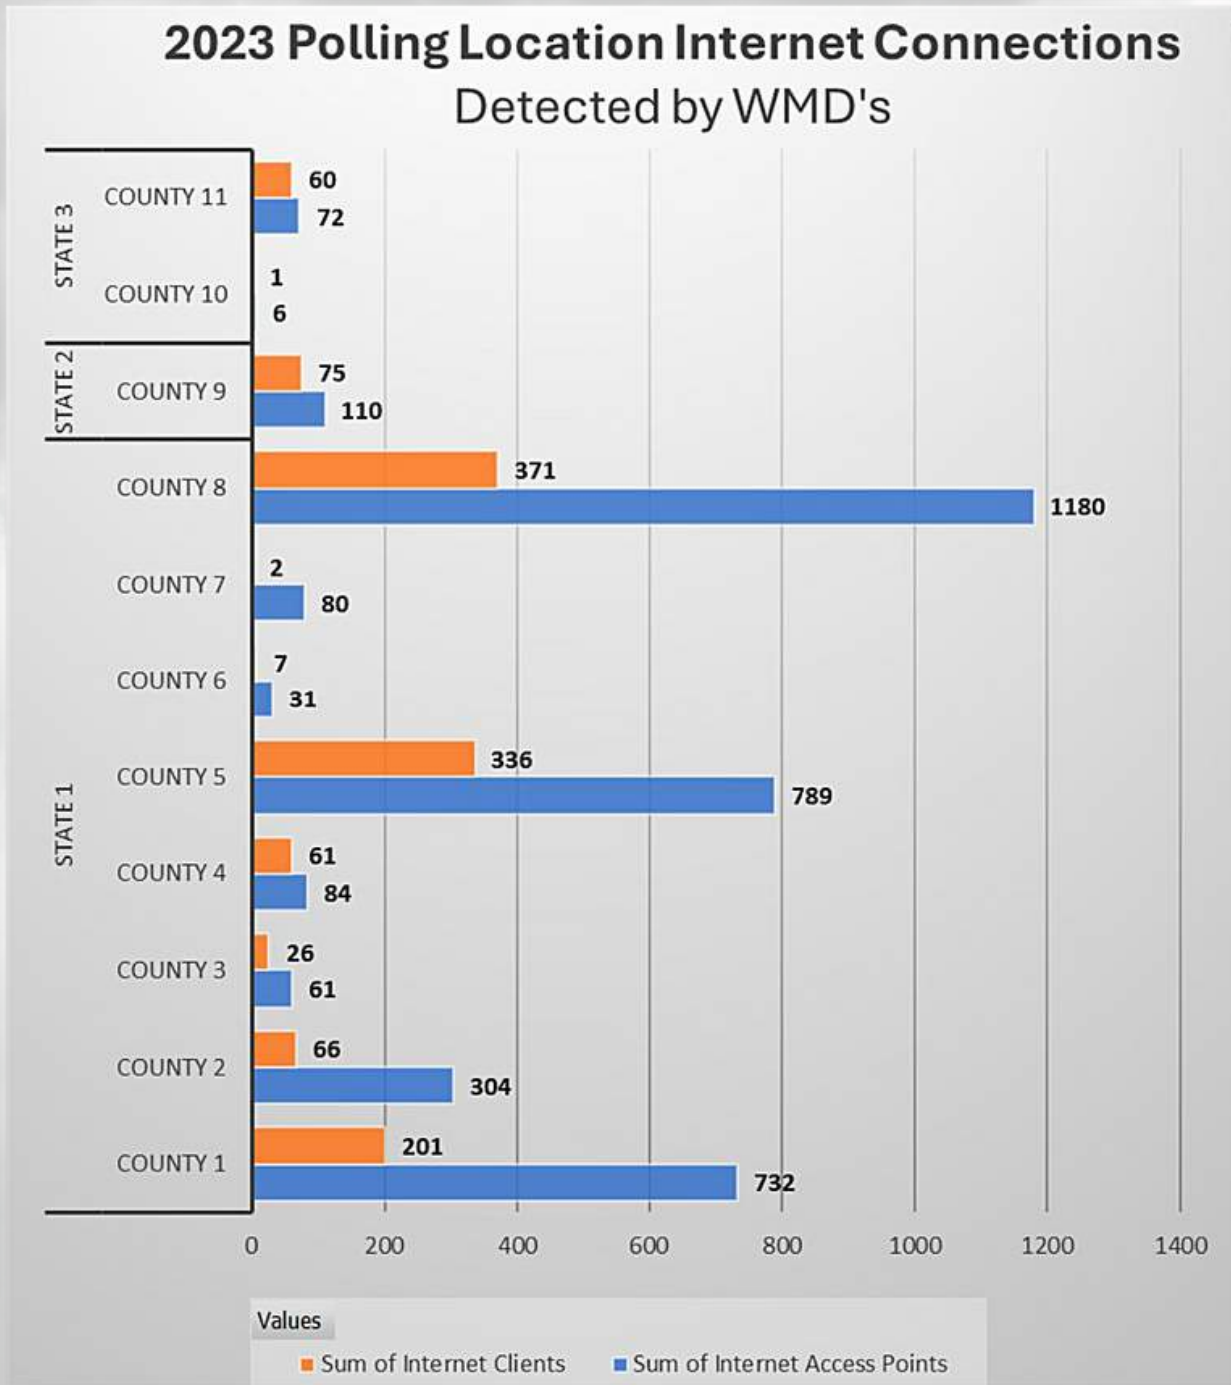

* Indicates manufacturer used in EAC-certified voting systems

The Plan is Working!

Wireless Monitoring Devices (WMDs) detected and classified devices connected to the Internet near polling locations in realtime!

2023 Election deployment covered 11 counties in 3 states.

Our Record of Success

LOF NETWORK'S SPONSORSHIP EFFORTS, PROMOTIONAL EFFORTS & ACCOMPLISHMENTS

COURT CASES & LITIGATION	EXPERTS & INVESTIGATIONS	CAUSE OF AMERICA	MACHINE ELIMINATION	COMMUNICATIONS
AZ: Multiple Kari Lake lawsuits including Lake v Hobbs	Mesa County, CO images of Dominion Election Management System (EMS) Server resulted in 3 expert reports exposing machine vulnerabilities	Create a 50 state network of grassroots leaders	Promoted and passed RNC Resolution to eliminate machines, require voter ID.	Documentaries kept election fraud in post-election headlines: Absolute Proof, Absolute Interference, Absolutely 9-0, Scientific Proof, Selection Code
AL: Injunction against use of machines: Hanes, et al v John Merrill as Secretary of State, et al	Nationwide voter registration investigation	Developed best in class hand count procedures	CA: Shasta County votes to defund machines and revert to hand counts	Events brought together investigators from all across America: Cyber Symposium, Moment of Truth Summit, Election Summit
AZ: Injunction against use of machines: Lake and Finchem v Arizona Secretary of State, Maricopa County	PA: UOCAVA, CVR investigations by Heather Honey	AL: Grassroots organizations funding	MO: Osage County hand count	FrankSocial application
CA: Alexander Haberbusch, Shasta County	AZ: Election investigations by Heather Honey	GA: Grassroots organization funding	AZ: Cochise County hand count	FrankSpeech application
AZ: Machine certification suit: Golec v Hobbs	WI: Dan Eastman investigations	WI: Grassroots organization funding	CO: Mesa County Recount of 2021 Municipal Election	FrankSpeech platform: 7 livestreams including Lindell TV, over 120 podcasters including Steve Bannon and Emerald Robinson
Article 4 guarantee clause violations and 14 th Amendment due process and equal protection	MI: FOIA Request funding	Drafting of model legislation	AZ: CV2022-00518 Arizona Alliance for Retired Americans suit calling for hand count after 2022 election	Nationwide billboard campaigns
CO: John Case legal work related to Elbert County	MI: Konnech investigations	Assisted multiple states with canvassing efforts including reports, walk books, and optimized walking routes	AR: Grassroots organizations campaign calling election officials to demand paper ballots	WI: Presentations to Wisconsin Senate
NAACP, League of Women Voters, Mia Familia Vota v USEIP, et al	National Konnech investigations	Provided hand count training and cost analyses	AR: Searcy County voted to go to paper ballots and 100% hand count audit of every election	WI: Presentations to WI Election Integrity Subcommittee
AZ: Abe Hamadeh election contest	Jeff O'Donnell Cast Voter Record Analysis	Provided digital canvassing tool to grassroots organizations	DE: Hand recounts revealed errors in machine count	AZ: Hearings on election issues
PA: Heather Honey v Lycoming County appeal to denial of cast vote records	Peter Bernegger investigations	Provided free, sharable Election Integrity National Library with over 6,500 documents	GA: Spalding and Paulding County Election Board voted to hand count all ballots prior to certification	LA: Voting System Commission expert testimonies in support of hand counts
	AZ: We the People Arizona Alliance investigations	Provided experts to grassroots groups to help with investigations	ID: 7 of 44 counties conduct full or partial hand counts	
	AZ: Dr. Shiva signature analysis	IA: Developed software to automatically complete and submit challenge forms	IL: Hand counting statutes in place	
	AZ, GA, PA, FL investigations by Kevin Monda	Developed a tool that converts CVR's in XML format allowing review by Jeff O'Donnell	KY: Comprehensive hand count legislation	
	WI: Wisconsin Election Commission WISCNET unauthorized transmission of election data to NGO	Provided NCOA data for dozens of states	LA: Statewide hand count tour. Multiple hand count demonstrations executed.	
	NCOA and Voter Roll comparison for almost all 50 states by Russ Schow	Provided report on ERIC voter roll anomalies	ME: Every town has the right to use or not use machines	

Rasmussen Reports
@Rasmussen_Poll

Update: A new high in voter distrust of the 2020 election results is set today.

"How likely is it that cheating affected the outcome of the 2020 presidential election?"

Likely / Not Likely -
Dem: 45% / 50%
Ind: 64% / 28%
Rep: 80% / 16%
All: 62% / 32% (new record high)

How likely is it that cheating affected the outcome of the 2020 presidential election?

Group	Very	Somewhat	Not sure	Not very	Not at all
All	43%	19%	8%	2%	28%
Republican	33%	27%	4%	3%	29%
Independent	46%	18%	8%	2%	26%
Democrat	32%	13%	5%	10%	40%

Survey of 1,050 US Likely Voters conducted April 27-May 2, 2023 by Rasmussen Reports and Political Media, MOE +/- 3%

- MA: City and town election officials have autonomy to choose to hand count elections. 57 out of 351 have opted in.
- MI: MI GOP conducted parallel hand counts of ballots during 2 conventions
- MN: Haven and Baldwin Townships passed resolutions to count by hand and by machine
- MS: County Elections Handbook allows hand count checks of machine tallies
- MT: Hand counts allowed within counties
- NH: Multiple towns voted to remove machines
- PA: Delaware and York County hand recounts
- SD: Hand count of elections is law of land
- TX: Paper ballot voting system can be adopted by every county
- UT: Over 1,000 Washington County residents have signed hand count petition
- VA: Loudoun County Kv Brown challenges machine certification and hand count remedy

Investment and Impact

We need to reach 150 million voters with the truth about what's happening in our elections.

Your financial support will provide the resources needed to investigate and give every voter the opportunity to hear the truth.

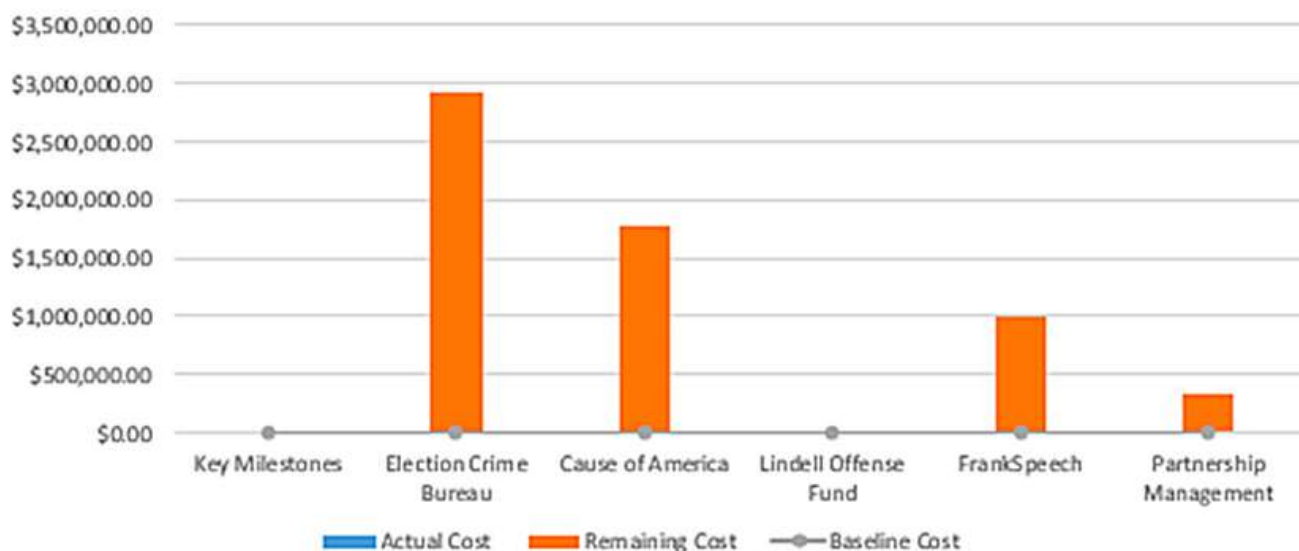

We must overcome the unconstitutional censorship by Big Tech and Big Media under the direction of the federal government.

Total 2024 Budget: \$6,050,000

We have developed a 13,320 task project plan delineating tasks, timing and resources necessary to secure the 2024 election. In order to execute this plan, we need to raise a minimum of \$6M.

Fundraising Goal: \$20,000,000

We know that we will be opposed in this endeavor by those invested in subverting the integrity of our elections. In this light, we need to have additional funds to support current and future legal actions.
